Tableau: Football Report

Dataset: https://www.kaggle.com/datasets/davidcariboo/player-scores
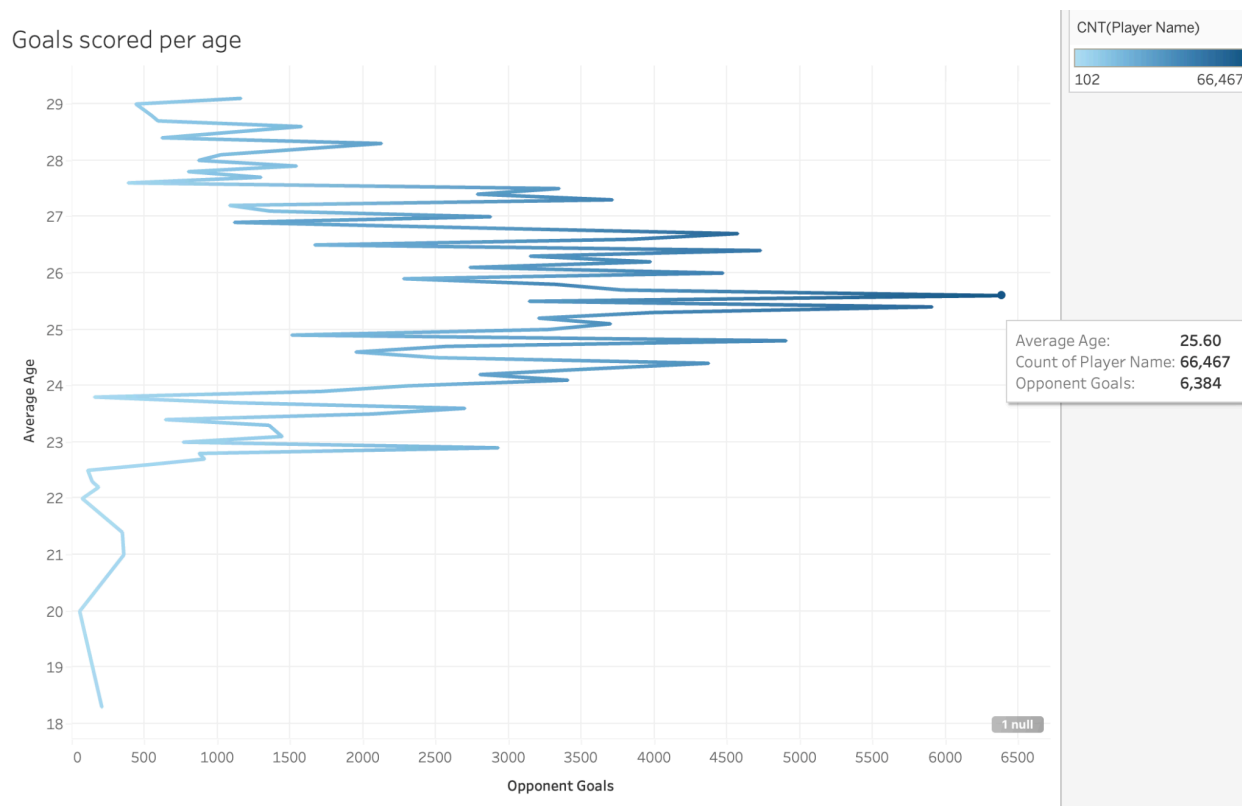

I used Tableau visualization to create some insights about the Soccer players and team
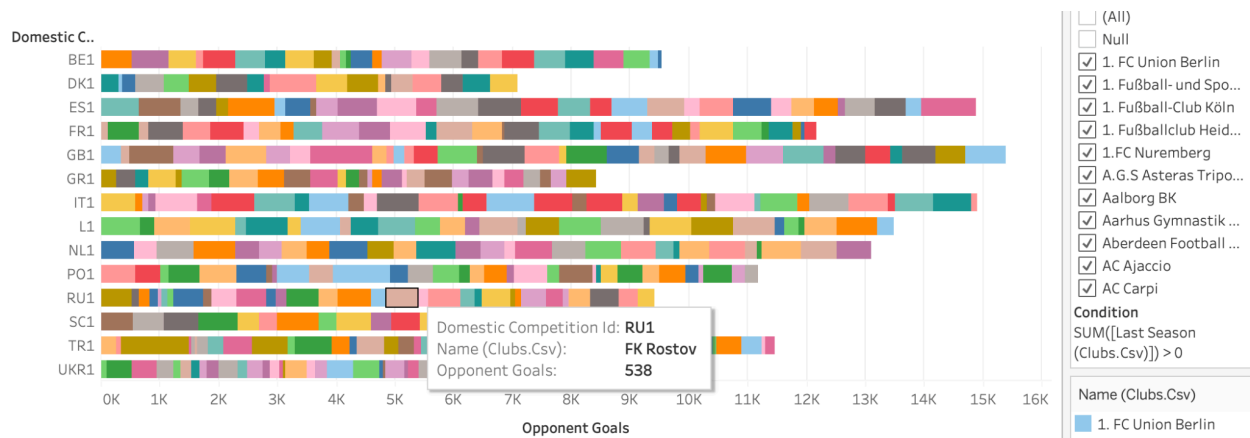

Insights:

1] Does young player score most goals?

Conclusion: As you can see average age of 18.5 yrs have scored just 200 opponent goals but the most goals scored is 6k + and have avg age of 25.6 years
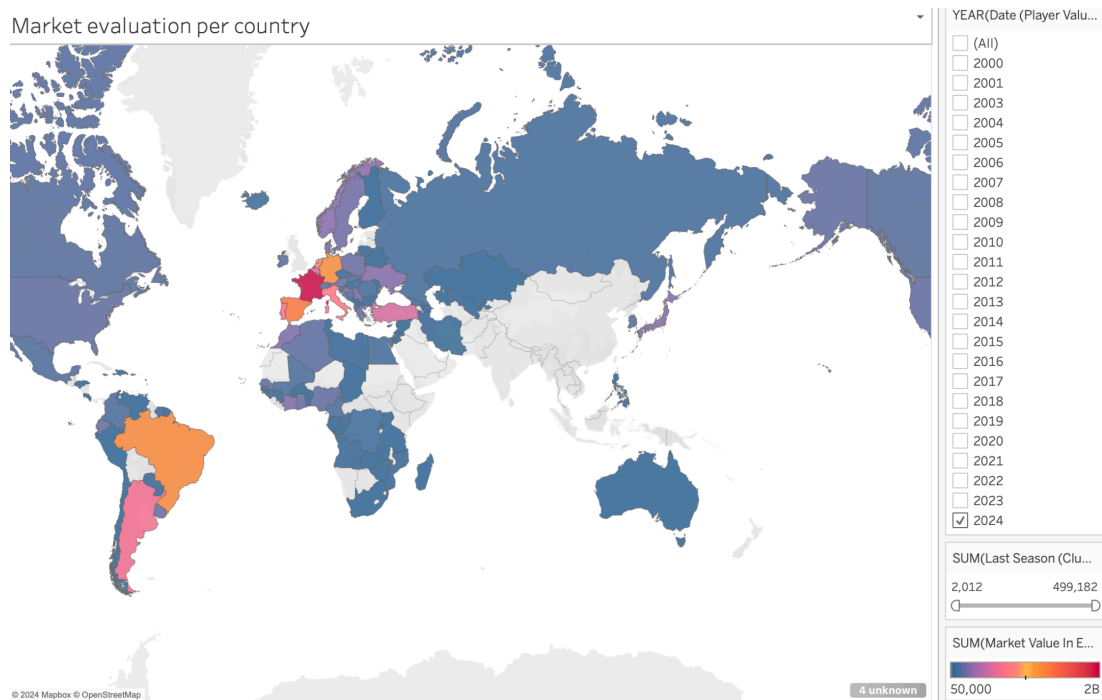

2] Which Domestic competition has highest opponent scores

Like everyone I also thought Spanish competition would have the highest opponent goals because of La-Liga but they are second in the list.

In this visualization you can see Great Britain which has Premier League as domestic competition has highest opponent score with more than 15,500 scores since 2012 - 2022

3] Which country has the highest market value players?

Like everyone I also thought most of the european countries would be there but only France and Spanish are in top three while brazil takes the 3rd Place in 2024

France has total market value of approx 1.5 B
Spanish has total market value of just more than 1B and Brazil just have less than 1B
